Esta Diretiva estabelece um sistema de permuta de informação, para os projetos de regras técnicas e de normas em preparação nos países da UE (União Europeia) e da EFTA (Associação Europeia do Comércio Livre), de modo a promover a sua harmonização e, assim, evitar obstáculos técnicos ao comércio.

Neste enquadramento, o IPQ é o organismo competente para: centralizar, coordenar e difundir toda a informação sobre as notificações referidas nos diplomas acima mencionados.

De notar que, o Estado-membro autor da notificação deverá sempre responder às reações emitidas, quer pela CE, quer por qualquer Estado-membro, através da Comissão, via Ponto Focal do Estado-membro.

No caso da reação, emitida por parte de um ou vários Estados-membros e/ou pela CE, durante o período de inquérito público, revestir a forma de um parecer circunstanciado, a data de adoção do projeto de Regra Técnica, por parte do Estado autor prolonga-se, a fim de que, o Estado-membro visado o possa analisar e tomar em devida conta.

Se a CE tiver apresentado, ao Conselho, a intenção de propor ou adotar um Regulamento, uma Diretiva ou uma Decisão, sobre a matéria que abranja, no seu todo ou em parte, o conteúdo do projeto de Regra Técnica proposto, este deverá ficar suspenso por 12 meses, a contar da data da apresentação à Comissão, da referida proposta.

Este mesmo período deverá ser respeitado se, a Comissão nos três meses subsequentes, verificar que o projeto de regra técnica é abrangido por uma proposta de Regulamento, de uma Diretiva ou de uma Decisão apresentada ao Conselho.

No caso de o Conselho adotar uma posição comum às situações verificadas para o prazo de 12 meses atrás mencionado, a publicação da Regra Técnica deverá ficar suspensa por 18 meses, a contar da data da apresentação à Comissão da proposta inicial.

Health Canada's Food and Nutrition Directorate is proposing a modification to the energy-related condition of the "free of sugars" claim in the Table of Permitted Nutrient Content Statements and Claims ("Table"). In July 2022, Health Canada revised the conditions for the "free of sugars" claim (item 37 of the Table), with the intention of making the energy requirements less restrictive. As a result, foods making a "free of sugars" claim can now meet the criteria for the "low in energy" claim (that is, 40 calories or less), rather than the criteria for the "free of energy" claim (less than 5 calories). The updates to item 37, however, unintentionally affected chewing gums. Consequently, chewing gums that were previously exempt from the energy requirements of the "free of sugars" claim may no longer be in compliance with the Food and Drug Regulations after the applicable transition period ends on December 31, 2025.

Proposed rule - The Food and Drug Administration (FDA, the Agency, or we) is proposing a tobacco product standard that would regulate nicotine yield by establishing a maximum nicotine level in cigarettes and certain other combusted tobacco products. FDA is proposing this action to reduce the addictiveness of these products, thus giving people who are

addicted and wish to quit the ability to do so more easily. The proposed product standard is anticipated to benefit the population as a whole. For example, it would help to prevent people who experiment with cigarettes and cigars from developing addiction and using combusted tobacco products regularly.
